

Cristo-Aero™ Panel - Technical Datasheet

Onyx Cristo-Aero™ Bar Top

Cristo-Aero is our lightweight panel designed specifically for interior aerospace applications. The panel comprises a stone veneer bonded to an aerospace-grade Nomex panel.

Cristo-Aero Panel Section

Key Features -

- Stone veneer bonded to Nomex panel
- Thickness of 20-35mm dependent on stone veneer
- Weight of 20-39 Kg/m²
- Panel sizes up to 3m x 1.5m
- A range of finishes available e.g. Satin, Textured

Benefits -

- ⊕ Lightweight solution
- ⊕ Fulfills aerospace requirements regarding fire and heat resistance
- ⊕ Large format panels
- ⊕ Strong mechanical performance
- ⊕ Visual aesthetics of natural stone
