Marine

Cristocomb™ is our lightweight stone veneer and fibreglass aluminium honeycomb composite panel. It's suitable for interior facades and low-rise exterior facades, interior surfaces and stone fabrications due to its high-strength and low weight.

Cristocomb Panel Section

Key Features -

- Stone veneer bonded to aluminium honeycomb
- Thickness of 9-35mm dependent on stone veneer and honeycomb thickness selected
- Weight of 15-43 Kg/m²
- Panel sizes up to 3m x 1.5m
- For facades, mechanically retained by undercut anchors to an aluminium support rail system
- A range of finishes available e.g. Satin, Textured

Benefits -

- ⊕ Lightweight facade solution
- ⊕ High-impact resistance
- ⊕ Maximum resistance to fire and heat
- ⊕ Large format panels
- ⊕ Strong mechanical performance
- ⊕ Visual aesthetics of natural stone
- ⊕ Customisable material production
