

Material Comparison Chart

| Material | | Scratch | UV | Chemical | Strength | Work-ability |
|-----------|------------|---------|-------|----------|----------|--------------|
| Marble | Natural | •• | •• | •• | ••• | ••••• |
| Limestone | Natural | •• | •• | •• | ••• | ••••• |
| Granite | Natural | ••• | •••• | •••• | •••• | •••• |
| Quartz | Engineered | ••• | ••• | •••• | •••• | ••• |
| Porcelain | Engineered | •••• | ••••• | ••••• | •••• | •• |
| Ceramic | Engineered | •••• | •••• | •••• | •••• | •• |

Natural stone is quarried all around the world and there's a huge range of colour and material choices with natural veining, grains and patterns.

With technological developments, man-made alternatives are becoming a popular alternative due to their luxury appearance at a typically lower price point.

Compare the performance attributes of each type of stone below or contact us for a material recommendation for your project.
